

ABDULRAHMAN FATHY EL-SAYED KHALIL

DATA SCIENTIST & AI UNDERGRADUATE | MINISTRY OF COMMUNICATIONS TRAINEE

📍 Location: Egypt

🌐 GitHub: github.com/Osaldas21A

🔗 Specializations: Data Science & AI

PROFESSIONAL SUMMARY

Dedicated 2nd-year Artificial Intelligence student at the Faculty of Computers and Information and specialized Data Science trainee under the Ministry of Communications and Information Technology (MCIT - DEPI initiative). Proficient in the machine learning lifecycle, deep learning architectures, relational database engineering (SQL), and algorithmic problem-solving in Python and C++. Passionate about leveraging data-driven solutions, building predictive pipelines, and delivering scalable data infrastructure for freelance and enterprise projects.

EDUCATION

Bachelor of Science in Computers and Information

2024 - Present

Faculty of Computers & Information | Department of Artificial Intelligence (2nd Year Student)

- Specializing in Artificial Intelligence, Machine Learning Algorithms, and Advanced Data Infrastructure.
- Relevant Coursework: Data Structures & Algorithms, Relational Database Systems (SQL), Machine Learning Foundations, Deep Learning Architectures, Cloud Computing Models (IaaS, PaaS).

GOVERNMENT INITIATIVES & SPECIALIZED CERTIFICATIONS

Ministry of Communications & Information Technology (MCIT)

Pioneers of Digital Egypt Initiative (DDEI) - Data Scientist Track | 2024

Selected for intensive government-sponsored professional training focusing on end-to-end data science lifecycle, predictive machine learning models, data tracking engines, and business analytics.

Oracle Certified Associate - Oracle AI Foundations

Oracle University | Certified Aug 2024

Verified proficiency in artificial intelligence principles, cloud AI services, machine learning mechanics, and modern data processing.

TECHNICAL SKILLS & EXPERTISE

Programming Languages	Python, C++, SQL
Data Science & ML	Machine Learning Pipelines, Deep Learning Frameworks, Model Tracking, Data Aggregation
Databases & Architecture	Relational Databases (SQL), ERD Schema Design, Data Warehouses, Data Marts
Algorithms & Engineering	Data Structures, Sorting/Searching Algorithms, Graph Traversal (BFS, DFS)
Cloud & Infrastructure	Cloud Service Models (IaaS, PaaS), Centralized Data Repositories

FREELANCE OFFERINGS & EXPERTISE

- Data Science & ML Pipelines:** Designing, training, and deploying end-to-end predictive machine learning models [cite: 5, 7].
- Database Design & SQL Optimization:** Building structured relational database models, ER diagrams, and data mart schemas [cite: 5, 7].
- Custom Python & C++ Scripting:** Writing high-performance algorithmic scripts for complex data transformation and automation [cite: 5, 7].
